## **MAINE REAL ESTATE SALES UP 26.88 PERCENT; PRICES JUMP 24.5 PERCENT**

AUGUSTA (Nov. 19, 2020)—Maine’s real estate sales are heating up—by double digits. According to statistics released today by the Maine Association of Realtors, Realtors across the state sold 2,341 single-family existing homes last month—a jump of 26.88 percent over October 2019. The median sales price (MSP) for homes sold reached \$280,000, a 24.50 percent increase over October 2019. The MSP indicates that half of the homes were sold for more and half sold for less.

“The residential real estate recovery since the COVID-impacted second quarter has been robust,” says Tom Cole, 2020 President of the Maine Association of Realtors and Broker with Better Homes and Gardens Real Estate The Masiello Group in Brunswick. “January through October 2020 sales are 5.6 percent ahead of the comparable time period for 2019—Maine’s best year ever.

“Buyers are plentiful across Maine and they are facing a sustained tight supply of for-sale inventory. This supply/demand imbalance, buoyed by historically-low mortgage interest rates, is resulting in increased competition and price appreciation.”

The National Association of Realtors reported a national sales increase of 26.7 percent last month, while the national MSP reached \$317,700—a rise of 16.0 percent. The regional Northeast experienced a sales climb of 30.4 percent in October, and a 20.2 percent jump in median sales prices to hit \$356,500.

“Maine’s lower incidence of COVID compared to the rest of the country, plus the increase in tele-working, has resulted in out-of-state buyers adding to the demand for Maine homes,” explains Cole. “Historically, about 25 percent of monthly home purchases in Maine are by out-of-state buyers; during October, that number was 36 percent. Working with a Realtor gives buyers and sellers the advantage they need to succeed in the current market conditions.”

Below are two charts showing statistics for Maine and its 16 counties. The first chart lists statistics for the month of October 2019 and 2020 only, statewide. The second chart compares the number of existing, single-family homes sold (units) and volume (MSP) during the rolling quarter of August, September and October of 2019 and 2020.
